Fundraiser for
Brain Cancer
Research

HADASSAH

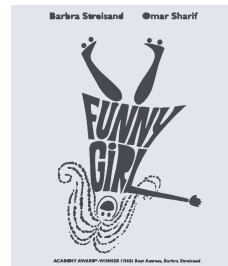

Since the 2003 opening of the Leslie and Michael Gaffin Molecular Neuro-Oncology Laboratory at Hadassah Hospital in Jerusalem, researchers have been focused on developing advanced diagnostic tests for brain tumors. Recent lab tests show that the same drugs successfully used for prostate cancer are also efficient in killing brain tumor cells, a finding that may change the treatment of brain tumors and bring new hope to patients.

Merry Drench was an author and a popular lecturer in Physical Therapy and Behavioral Sciences. She was known for her sharp wit and great sense of humor and brought these same gifts to her decades of service and devotion to Hadassah.

Merry was a second-generation Life Member of Hadassah. Besides her role as president of the Western New England Region, she held many positions over the years, including president of Hadassah Rhode Island.

Unfortunately, Merry lost her battle with brain cancer in May, 2013. Her love of musicals makes this fundraiser a perfect way to "applaud" Merry for the wonderful person that she was. She is missed by all who knew her.
